

## FRONTEND DEVELOPER

I'm an experienced frontend developer and I like to work on beautiful and user-friendly products. Studied graphic design. Throughout my career I worked in multiple areas of the development process and therefore can relate well with other stakeholders in the project. Like to focus on complex frontend applications using the latest techniques, always trying to learn more and lift the project to the next level.

### SKILLS

- Javascript
- Typescript
- HTML
- CSS / SASS
- Web Components
- ReactJS
- NextJS
- VueJS
- Svelte
- Lit Elements
- StencilJS
- Redux
- Unit Testing
- Storybook
- Cypress
- Testing library
- Sitecore
- Accessibility
- UX Design
- Photoshop
- Illustrator
- After Effects
- InDesign
- Figma

### WORK EXPERIENCE

SEP 2021  
PRESENT

Leading a team of 16 frontend developers, in their day to day activities.  
Responsibilities:

- Making sure that everybody is on an interesting project
- Helping people with their personal development
- Organising events and knowledge sharing

Next to managing the team, I also helped out with internal marketing, like newsletters, creating aftermovies of events or trips.

*Photoshop - After Effects - Illustrator*

MAY 2017  
PRESENT

As a frontend developer, there were multiple projects:

APR 2022  
PRESENT

FRONTEND DEVELOPER |

is a specialist, independent wealth manager dedicated to preserve and create wealth sustainably, for our clients and the society we serve.

I lead a team of 5 frontend developers creating a component library for the public website that is in development.

Responsibilities:

- Mentoring developers
- Planning of sprints
- Developing the base platform

*ReactJS - Typescript - NextJS - Sitecore JSS - StencilJS - Storybook*

## WORK EXPERIENCE

APR 2021  
DEC 2021

Eneco is a Dutch energy company, serving more than 2 million business and residential customers. I worked with a small team to create a new platform for all company web apps. Eneco uses Sitecore as their CMS of choice and the new platform uses the headless API of Sitecore for implementation of the new components library.

Responsibilities:

- Creating the component library
- Creating the first feature on the platform and thereby help find some flaws in the new platform
- Discussing with stakeholders about implementation of UX and design

*ReactJS - Typescript - Sitecore JSS - NextJS - Storybook - Cypress*

NOV 2020  
MAR 2021

Triple is a full service digital agency that helps companies by crafting digital experiences. I worked on the web application for NLZIET. A video streaming service corporation between several dutch tv companies like NPO, RTL and SBS. The biggest challenge on this project was the time constraint. To plan and develop in the short time available for the project going to beta.

Responsibilities:

- Creating the full UI of the app
- Creating the UI of the videoplayer
- Planning to deliver on time and still stand for code quality

The next step was to work on the smart TV Platform, which enables Triple to quickly roll out several TV providers like NLZiet, Streamz, NPO and Kijk. Because of the constraints in CPU power of most TVs we choose to use Svelte.

*ReactJS - Svelte - Typescript - Bitmovin Videoplayer - Jest*

AUG 2019  
OCT 2020

Thermostat is a dutch company, that created smart thermostats. My main focus was to gradually migrate the codebase of the mobile application from Backbone to ReactJS. I also started up a guild for the frontend, vastly improving the communication between the different frontend teams in the company. With the guild in place it was finally possible to identify the technical debt that was build up over the years and start to improve the codebase gradually.

Responsibilities:

- Migrating the codebase to React
- Improving the codebase, removing tech debt
- Getting the teams to work in the same way

*ReactJS - Backbone - Redux - Cypress - Storybook - Jest - NodeJS - Cordova*

## WORK EXPERIENCE |

JAN 2018  
AUG 2019

multinational in retail and investment banking and insurance services. has turned to Polymer web components for the banking app. I worked with one of the core teams on the new personalisation API and functionality. I coached new teams to get them up to speed with the frontend platform and to help them out with Polymer and web components. During my time at the teams moved from Polymer to LIT Elements to create web components.

Responsibilities:

- In Between for the Frontend guild for GDPR implementation
- Coaching of new teams
- Building new features in the banking app

*Polymer - LIT Elements - REST - Bower - Webpack*

MAY 2017  
DEC 2017

was a financial startup under the banner c The frontend of the application was build in AngularJS with a Sitecore backend. I worked in a team of frontend and backend developers to build features. A great emphasis was put on the graphic design of the product, so I also had to build lots of CSS and custom animations were build.

*AngularJS - SASS - BEM - REST - Webpack - Microsoft TFS*

MAY 2017  
MAY 2021

is a developer conference I volunteered for. I helped out developing applications for the different events that happen during the year, like the yearly conference and the frontend pub quizzes. Development was done in VueJS or ReactJS. I'm also the of the Frontend pub quiz and give workshops "frontend Masterclass".

Responsibilities:

- Developing applications for the yearly conference
- Hosting the Frontend pub quizzes
- Teaching a workshop "frontend Masterclass"

*VueJS - ReactJS - Firebase - oAuth*

NOV 2016  
APR 2017

is a data company that tries to collect all relevant data of every company in the Netherlands and serve it to their clients. At the time the application consisted of Java templates enriched with JavaScript. I was mostly responsible for new features and making the application responsive.

Responsibilities:

- Creating new features
- Investigate how to migrate the application to a Single Page Application

*Javascript - JQuery - ReactJS - HTML - CSS - SASS - Enzyme - Grunt*

## WORK EXPERIENCE

MAY 2012  
OCT 2016

is the world leading manufacturer of sports timing equipment for running, swimming and motorised racing.

I was responsible for the technical development of all websites and web applications, but also for the UX and graphic design for the apps. I was also the communication liaison between the development and the marketing/sales department.

*Javascript - PrototypeJS - ReactJS - HTML - CSS - MYSQL - Gulp - PHP - Symfony2 - Wordpress - Photoshop - Illustrator - Axure*

OCT 2002  
AUG 2012

The first version of the application was in Classic ASP.

After a couple of years there was a complete rewrite to PHP with the Symfony2 framework

*Javascript - JQuery - HTML - CSS - Classic ASP - Symfony 2 - MYSQL - Photoshop - Illustrator*

NOV 2010  
NOV 2011

ty is a producer of software for different sports tournaments and competitions, like badminton and tennis.
